

HBase-Writer 0.9-SNAPSHOT Released

Contributed by Ryan Smith
Monday, 29 March 2010

HBase-Writer version 0.9-SNPASHOT has been released and is available for download now. This version of HBase-Writer has support for both Heritrix2 & Heritrix3. The README file changed and some new ones were added. Be sure to check them out for new Heritrix3 support. Much thanks to Greg Lu for spearheading this effort and sending in the initial patch. Once Heritrix has an official 3.0.0-RELEASE, then HBase-writer will release version 0.9-RELEASE. Feel free to create Issues if you want to see support added for something or if you have a bug to report. Thanks for checking it out and Enjoy! :)
